## Twin Valley Fire Department Newsletter

Despite the wet weather the Twin Valley Fire Station is well underway. Thanks to the support of many in the community, the building is emerging from the ground. Thousands of yards of soil have been shaped and moved, footing excavation is complete, and the Fire Department volunteers have begun to lay radiant tubing. Dymond Quality Builders, and Twin Valley Fire Department would like to thank Lyons & Hohl site contractors, Stott Enterprises, Stoltzfus Spreaders, Berks Homes, the Hertzler family, Sam Acker Excavating, Elverson Supply Company, and Key Equipment for their generous donations of both time and equipment in helping to keep the project moving despite mother nature. As the building continues to progress from the ground we continue to ask the community for support, as all the building funds are being privately raised by the brave men and women who will risk everything to help save a stranger's life and property. As we move forward we ask your continued prayers for the safety of the Fire Department and EMS personnel and for all the contractors working to bring it together. Anyone with questions regarding the project can call Ray Dymond Jr. @ Dymond Quality Builders 610-286-1685, or 610-286-5021 Donations can be mailed to **TVFD BUILDING FUND P.O. BOX 181 ELVERSON, PA 19520** Businesses with un-needed equipment or supplies are also asked to donate in order to better support our local volunteers. We appreciate your support.
